of this PDF file.

Mint of the United States  
 Philad<sup>a</sup> January 1833

In obedience to the resolutions of the House of Representatives of the 14<sup>th</sup> of December 1832, regarding the Director of the mint to report to the House, as far as in his power the present relative value of Gold and silver bullion in the principal countries of Europe and the United States that is to say if 371.25 grams of Fine silver is worth one dollar what is the worth of the same weight of Fine Gold:

And also "to report to the House his opinion of the degree of fineness, or proportion of alloy, the best fitted in Gold coins to give durability and continued brightness to the metal; and his opinion what is the most suitable metal for that alloy" the Director of the mint has the honor to submit the following report.

In accomplishing the object ~~imposed~~ to the present ~~part~~ of the first resolution, it has been considered desirable to ascertain, not only the relative value of Gold and silver bullion in the principal countries of Europe and the United States at latest dates to which authentic data apply, but also the average proportional value during a series of recent years, adequate to all the vibrations to which it is liable from transient causes. The latitude of enquiry seems particularly expedient in regard to United States, where the relative value of Gold and silver has exhibited conspicuous fluctuations within the last decade.

column 3. Column 4 exhibits the proportional value of Gold & silver in Paris, deduced from the most authentic quotations of the premium of gold above the mint ratio in France of 15.5 to 1, for the last seven years, with a correction thereof for the difference in the charge of coining gold and silver. Column 5 contains the proportional value of gold and silver in the United States deduced from the premium on gold over the mint ratio of 15 to 1, which premium is exhibited in Column 6. Column 7 exhibits the Exchange of the United States on London extracted from the Philadelphia prices current, estimated according to the <sup>nominal</sup> ~~exchange~~ par of \$4.44 - Column 7 gives the above quotations reduced to the medium actual par of 4.80.

It will be perceived that the proportional value of gold to silver bullion in England as exhibited in table B, is singularly diverse from that established in the coins by mint regulations and given in table A. Under this aspect, the <sup>relative</sup> ~~value~~ value of gold would seem to be underrated. By a peculiarity of the monetary system of England, however, gold, of which the coinage is free is made the only general legal tender <sup>while</sup> silver, which, after being subjected at the mint to a seignorage of more than 8 per cent. deducted from the weight of the coin, is limited in its application as money to payments of 40 shillings. Gold is by this regulation rendered indispensable to the national currency, while silver, except for minute transactions, can be regarded only as an article of commerce. It results therefore that the nominal mint ratio of gold to silver in England, of 14.28 to 1, expresses, in fact, only the proportional value of the fine gold in two sovereigns, to the fine silver in 40 shilling

pieces. This is the actual proportional value of gold and silver to that extent, and both are thus far equally a legal tender. Beyond this sum the comparison in coin ceases, and the proportional value of those metals is to be sought for, in the market price of gold and silver bullion, measured in gold coin, which will be found in the third Column.

From the above peculiarity in the coinage of Great Britain, which though authorised by law in the year 1816, was not in such effective operation as to test its ultimate influence, until 1821, has probably resulted, more directly, than from any other cause, the advance in gold in the United States which began to be observed in that year. In order to fulfil the requisitions of a resolution of Parliament of 1819, as appears from the published reports, an amount in gold, equal to about ninety five millions of dollars, was required to be imported within the succeeding four years. This operation which was accomplished could not fail to be sensible in the United States, intimately connected as they are, by commercial intercourse with England, and setting a value on gold in proportion to silver, lower than ~~any~~ of the other nations from which this supply was to be drawn. It was accordingly felt in a premium on gold, paid first in 1821. The expanded currency of England and the continued demand for gold, resulting from her exclusive monopoly in regard to silver, together with her extensive connection with the United States, may be regarded as exercising a constant influence to maintain the premium on gold ~~measured~~ ~~in~~ ~~silver~~ which from that period to the present time has not ceased in this country, though subject to many fluctuations

in its amount.

Much less satisfactory data <sup>have</sup> been found for determining the relative value of gold & silver in the bullion market of the other nations of Europe. It has seemed therefore preferable to rely on <sup>the</sup> more accessible & well ascertained <sup>fact</sup> of the case in regard to England and France. From their extended commercial relations and the great and the great mass of the precious metals employed by them in currency and the arts, these nations and especially the former, the peculiar structure of the currency may be regarded as presenting the measure of the proportional value of gold and silver for the adjacent countries. This conjecture is amply confirmed in the evidence of N. M. Rothschild Esq. given before the Committee of Parliament on the Bank of England. A special fact stated on that occasion by the ~~individual~~ <sup>person</sup> above mentioned, seems not undeserving of notice under this aspect of the subject. On the 24th July last it appears that 1,410,000 francs in gold were purchased in Paris, at a premium of one percent, and transmitted to London. This premium <sup>on the ratio of gold to silver in France</sup> is equivalent to the proportional value of 15.66 to 1. If to this be added  $\frac{1}{4}$  of one per cent as the minimum charge on the transaction, it will give for the proportional value of gold to silver in London 15.70 to 1. —

The report of the above committee made in August last, and of which the evidence mentioned forms a part, presents many indications of <sup>controlling</sup> ~~controlling~~ influences derived from the monetary system of England, over the price of gold in the other countries of Europe including France, in all of

which silver is adaptable to currency so freely as gold and in some of them preferable to it. The general tenor of the columns of relative value in table B, illustrates also this superior influence of the bullion market in London on the relative value of gold and silver. In regard to the United States, this superior influence seems unquestionable. Gold is occasionally exported to France at the current premium, but for more frequently it is believed to England. The fact indeed is familiar at the present, that gold coins remain in the vaults, unclaimed by the depositor, until the day of the departure of one of the packets for Liverpool. —

The conclusion seems on full consideration to be sustained, that the proportional value of gold and silver in London & Paris, and especially the former, expresses the extreme measure of the relative value of these metals under the present state of supply and demand, in that community of nations to which the United States pertain. The facts wrought for by the first revolution, in regard to these nations, and their effect on the ratio of gold to silver in the United States, ~~it is~~ <sup>it is</sup> believed are exhibited in the table with a near approximation to truth.

The proportional value of gold and silver bullion in columns 3.4 and 5 it will be perceived expresses the value of 371 $\frac{1}{2}$  grains of pure gold according to those proportions ~~being~~ <sup>being</sup> the dollar of 371 $\frac{1}{2}$  grains of pure silver, being the unit.

The average relative value of gold and silver bullion in London for the whole period of 12 years it will be

found is 15.77 to 1, so that 15.77 years of pure gold would be  
of the value of \$ 15.77 - the dollar unit consisting of 371 1/4 grains  
of pure silver. The average of the last three years is in the  
proportion of 15.55 to 1. The relative value for the last year  
alone it appears has been 15.96 to 1 —

The average relative value of gold and silver bullion in France, it appears, has been 15.68 to 1, so that the value of 371/4 grains of fine gold would be \$15.68 the dollar unit being as before. The average of the last three years gives the proportional value of \$15.70. The relative value for the last year alone, is 15.69 to 1 and silver bullion relative value of gold, in the united

The average relative value of gold, in the United States, for the whole period, it will be observed, is 15.63 to 1, and silver eighteen and seven eighths, so that the value of 3 7/8 grains of pure gold would be \$15.63, the dollar unit <sup>consisting</sup> as before of 3 7/8 grains of pure silver. The average of the last three years gives the proportional value of 15.59, to 1. The value of the last year alone is 15.46 to 1, the average results for England &

On comparing the above <sup>average</sup> results for England & the United States during the whole period, ~~and also~~ <sup>with those during</sup> the last three years, with that of <sup>as also</sup> the year immediately preceding each ~~year~~ year separately, it appears, that in both the average of the last three years differs only a half per cent in London and only one third percent in the United States from that of the whole period. That <sup>during</sup> ~~within~~ those three years no annual average is so ~~high~~ <sup>low</sup>, that <sup>within</sup> the whole period a higher has occurred, nor any so low but that within the whole period there are examples of a lower. In regard to France the same comparison applies, except that the average of the last year is ~~also~~ <sup>not</sup>

In regard to France, the same experience of the experts  
that the average of the catarrh is the highest of the  
whole range - the fluctuations are however less than  
either in England or the United States. ↗

The result of actual shipments within recent years of gold and silver from the United States to London and Paris are conformable with but slight inequalities to the deductions on which the columns of relative value in table 8 have been constructed.

It appears therefore rational to conclude that the average of the whole period from 1821 to 1832 inclusive may be regarded as exhibiting the result of all the fluctuations incident to a state of peaceful relations. Within this interval all the ordinary causes of irregularity seem to have worked their effect more than once and to have yielded again to those counterbalancing equivalents which limit their disturbing power. The commercial exchanges appear also during this period to have passed through all the vibrations to which under ordinary circumstances they are exposed and the relation they bear to the proportional value of gold and silver bullion is illustrated by the annual averages presented in the table.

In regard to Spain in which gold is valued by  
much less than its value relative to silver is  
found at any time to advance in the bullion markets of  
which quotations have been given the information obtained  
is very limited. No evidence however has appeared of a  
special influence on the value of gold and silver in  
general derived from that quarter. The ratio of gold to

Silver in Spain appears to be <sup>valuable</sup> in the United States only as it regards the price of bullions and their divisions which for employment in the Spanish markets are usually at a premium above silver exceeding that current premium on any other form of gold. For the same markets however other descriptions of gold either coined or uncoined do not bear a premium equal to that elicited for the demand by shipment to England or to France.

On the whole it may be assumed that the relative value of gold and silver bullion in Europe may as far as regards the United States be sought for in England and France. That in the former the relative value at the present time may be estimated at about 15.75 to 1 being equivalent to a premium on our ratio of  $5\frac{1}{2}$  per cent. That in France the relative value may be estimated at about 15.68 to 1 which is equivalent to a premium on our ratio of  $4\frac{1}{2}$  per cent. In the United States the relative value of gold and silver at the present time may be estimated at about 15.63 to 1 corresponding to a premium of  $4\frac{1}{2}$  per cent on our present Mint ratio.

On the questions embraced in the second resolution in regard to the fineness and alloy suitable for gold coins the following observations are respectfully submitted.

It appears to be generally conceded that the complexion of fine gold possesses very superior beauty. In this state also it is capable of resisting wear & high degree the <sup>highest</sup> acting those agents to which a coin is ordinarily exposed in circulation leading to its loss of brilliancy. Two

<sup>qualities</sup> ~~qualities~~ very desirable in a coin are its attractive color and inducing brilliancy would be therefore obtained by employing fine gold and if no other considerations were involved fine gold in this state would be entitled to a preference for coinage. In other particulars however it appears to be less suitable for the purpose than gold combined with certain other metals.

An extended series of experiments was made under direction of the British Government by Mr. Kitchell to determine the effects of attention on gold in its pure state and alloyed in various proportions with different metallic substances. The result of these experiments conducted with great care and by manipulation well devised to ~~ensure~~ <sup>insure</sup> success appears to establish the conclusion that fine gold is less fitted to resist loss by the attraction to which it is liable in circulation than <sup>when it contains</sup> ~~when it contains~~ <sup>the alloy of silver & copper</sup> ~~the alloy of silver & copper~~ <sup>or of either alone</sup> ~~or of either alone~~ <sup>by itself</sup> ~~by itself~~ <sup>in the alloy</sup> ~~in the alloy~~ <sup>the quality of gold in this respect</sup> ~~the quality of gold in this respect~~ <sup>that</sup> ~~that <sup>the alloy</sup> ~~the alloy <sup>is the account as in the</sup> ~~is the account as in the <sup>case of the</sup> ~~case of the <sup>United States to that</sup> ~~United States to that <sup>of the</sup> ~~of the <sup>weight of the coin its efficacy is greater than if</sup> ~~weight of the coin its efficacy is greater than if~~ <sup>the proportion were diminished and that if this grade of alloy</sup> ~~the proportion were diminished and that if this grade of alloy~~ <sup>be constituted of equal parts of silver and copper its efficacy</sup> ~~be constituted of equal parts of silver and copper its efficacy~~ <sup>can be no further improved. Several derivations however from</sup> ~~can be no further improved. Several derivations however from~~ <sup>the</sup> ~~the <sup>best proportion of the alloy or of its constituent parts</sup> ~~best proportion of the alloy or of its constituent parts <sup>occurred in the experiments</sup> ~~occurred in the experiments~~ <sup>is a matter of much discussion a great reward having</sup> ~~is a matter of much discussion a great reward having~~ <sup>been</sup> ~~been <sup>in the history of the precious metals sciences</sup> ~~in the history of the precious metals sciences~~ <sup>advised to take above in regard to the capacity of fine gold to resist</sup> ~~advised to take above in regard to the capacity of fine gold to resist~~ <sup>by alterations in color. No experiment however</sup> ~~by alterations in color. No experiment however~~ <sup>appeared to the state</sup> ~~appeared to the state~~ <sup>in which there is observed a loss of brilliancy</sup> ~~in which there is observed a loss of brilliancy~~ <sup>than from that the</sup> ~~than from that the~~~~~~~~~~~~~~~~~~~~

therefore would require ~~nothing~~ <sup>nothing</sup> of the standard  
 are measured as before and another another unit we  
 measuring up would be found, the value thus altered has  
 better than that of our present standard the same man-  
 tions pertaining to coins.

In regard then to the expediency of changing the  
 reputation of alloy of either the one gold or silver coins it is  
 interesting to observe that the same change is advisable in  
 both without inconvenience and with some advantage.  
 Our gold & silver coins would then be no longer any with  
 each other and conformable to our decimal system. The  
 proportional value of the fine metal in the coins would  
 be the same as the proportional weight of the coins them-  
 selves. The dollar in value of the ~~present~~ improved standard  
~~containing~~ a ~~or~~ <sup>weight</sup>  $371\frac{1}{4}$  grains of fine silver  
 would counterpoise that ~~and~~ <sup>is</sup> ~~in~~ <sup>of the improved standard</sup> ~~the~~  
 supplied by the table of the fine metal. Thus our dollar in  
 value would ~~be~~ <sup>be</sup> ~~with~~ <sup>at</sup>  $\$15.82$  in gold and being  
 multiple of ten would be in coinage.

The present report purports to determine the proportion of value under present supply, demand - the circular exchange of bull nearly for the last three years & the fund of 12 has been the spot of transacting business - the average of this has been rather less than 100,000,000 from the whole amount

Mrs P. Foster

Philadelphia January 25

Dear Sir

It must be known to you that a great part of a lot of ground to which I have the right of possession, was occupied upwards of fifteen months, with materials necessary for the erection of the New Mint, thereby excluding me from the profitable use thereof - for which I have received no compensation and to which I think myself legally and justly entitled, I therefore submit the case to you for consideration, from the high character you sustain I feel persuaded that you will be ready to do justice between a widow, who is annually paying a high rent for the lot in question, and daily struggling to procure a livelihood by honest industry, — and the United States, by amply compensating me for the privileges alluded to, whatever your views may be on the subject I hope you will pardon the liberty I have taken in presenting mine in relation to it, and that you will be so good as to favour me with a reply,

M<sup>rs</sup> Samuel Moore  
Director of the mint

Very Respectfully yours  
Frances Hannis) Old and Broad St.

Mint of the United States  
Phila. Jan'y 29. 1833

Permit me very respectfully to represent that with the most devoted attention to the duties confided to me in regard to the extension of the Mint Establishment, I have endeavored for the full accomplishment of the object, exceed the amount contemplated in the communication which I have the honor to address to the Department on the 20th February last, conformably to which an additional appropriation of \$17,000 was made by Congress at their last session. The difference I apprehend will be very nearly, but cannot I am satisfied exceed \$11,000. This accrues chiefly under two heads of expenditure, viz, the Carpenter's work and the Machinery. In regard to both, it appears that the unusual character of the work to be executed, has rendered provision in estimates unattainable by the artists themselves.

The Carpenter's bill, agreeably to contract, is finally determinable by measurement, according to the rules of the Art. The calculations of the measures are not yet completed, though the work falling within their province is finished, and their report has been ~~urgently~~ <sup>promptly</sup> prepared. The amount of this <sup>small</sup> ~~sum~~ <sup>fund</sup> therefore cannot be rigidly stated even now, but from the number of days work performed, of which a minute record is kept, it is highly probable that the amount will exceed the estimate by a sum not less than from \$2000 to \$3500 ~~at least~~.

The cost of the Machinery has been fixed, in the issue, still left within the reach of our exact estimate. The Steam Engine alone has been the subject of a specific contract. The construction

Treasury Department,  
Comptroller's Office,  
21. February, 1833.

Sir,

I have to request that you will please  
to forward, as early as practicable, your accounts  
ending 31 December, 1832, in relation to Comings  
of Oath - Expenses - and Ordinary Receipts and  
Expenditures.

Respectfully,  
J. Anderson  
Comptroller

William Smith, Esq  
Treasurer of the Mint

Dear Sir

Washington Feb. 20. 1857

I arrived here on Saturday afternoon the 16th. - Young of the 12th was handed to me on Monday. What you say of Mr. Rade has nothing more to be said on that score. The letter to Mr. Rice was handed to him this morning having failed of meeting with him sooner. He has not yet appeared toward his attention much to the subjects on which I proposed to converse with him, but proffered very kindly his aid in procuring such information as could be obtained by writing to France.

An appointment was made yesterday with the Secretary of the Treasury to see him this day at One O'clock when the business interruption from morning calls should be over. The interview took place accordingly and resulted very satisfactorily. My wish to obtain information from France for the benefit of the West was not wholly new to him. More than a year since I suggested his aid to obtain from the French Minister the first report of a commission charged by the French Government with investigating the receipts for locating the proofs of copying silver, which I presumed would have been in his hands. ~~It was not until this subject had been furnished to me from the same source through Mr. Hoffman from which I was induced to expect a further report thereon.~~

The Secretary cordially approves of the proposed Mission - I named to him as <sup>principal</sup> object - the business proofs

Washington Feb 7 19 1839

Dear Sir,

I have in my possession  
three drafts from our Bank at  
Charleston, <sup>of currency</sup> on <sup>our</sup> <sup>Bank</sup> <sup>at</sup> <sup>Charleston</sup> <sup>of</sup> <sup>five</sup>  
hundred Dollars each, on the Globe  
Bank in Boston - payable at sight.

I wish as their agent to obtain  
for these drafts small change at  
the United States Mint - I should

like to have 5 10 & 25 <sup>¢</sup> <sup>pieces</sup>  $\frac{2}{3}$  of  
the amount of each denomination

I wish to have the change packed  
in <sup>two</sup> boxes -  $\frac{2}{3}$  in one and  $\frac{1}{3}$  in  
the other - Will you have the good.

- up to drop me a line and  
 inform me whether I can re-  
 -ceive this change on my ar-  
 -rival in the city - and upon  
 negotiating the drafts - I should  
 prefer to make the negotiation im-  
 -mediately & have the change  
 prepared ~~as~~ before stated - and  
 forwarded in one of your packets  
 to Boston - The one containing  
 \$500 - directed to "Messrs James Esq.

"Messrs Harris. Cashier of the Claremont  
 " Bank at Claremont N. Hamp.  
 To the care of Messrs James Read & Co  
 Merchants  
 Boston"

The other Box containing \$1000 -  
 sent also - and directed - to  
 " George Elliott Esq -  
 " Cashier of the  
 " Connecticut River Bank  
 " at Cheshire N. Hamp  
 To the care of ~~Geo Elliott Esq~~  
 Messrs James Read & Co  
 Merchants  
 Boston"

I will see you & satisfy all charges.

Respectfully Yours  
 Henry Hubbard

Concord Feb 8<sup>th</sup> 1833

In. enc. I transmit a small  
piece of Gold bullion taken out of a  
can recently operated upon which promises  
to be productive. we know not its value  
Will thank you to have it appraised in  
the mint and write me an answer what  
it is worth & oblige your friend

Department of War  
Office Indian Affairs  
February 8 - 1833

Sir.

I have received your letter of the 30<sup>th</sup> ultimo, with Mr Eckfeldt's account for 250 medals furnished for Indian Chiefs amounting to 1,476.87  $\frac{1}{2}$ . The account has been allowed, and the amount thereof will be remitted to you from the Treasury, for Mr Eckfeldt.

Very respectfully  
Yours &c &c  
Robert Herring

Dr Land Moore  
Chick

Columbia S.C. Feb. 7. 1833.

To the Director of the  
Mint of the United States,

Sir,

The Commercial Bank of Columbia S.C., of which I am President, occasionally receives in payment and on pledge for advances made, gold in the bar, which we undertake to forward to the Mint as the gold region is immediately above us, we are likely to be engaged in this business to some extent. We should therefore be glad to learn the course ~~the~~ best suited to the business and in what manner we can have the mint certificate passed to our credit in the Bank of the United States in Philadelphia? Can you inform us whether that bank will allow us the current premium without resorting to an agent?

We should be glad also to be informed what has been the average value of the gold from North & South Carolina, heretofore sent to the mint. We are aware

that there are mines, where gold  
is worth 93 cents per dozt, but we  
do not know the minimum value  
this knowledge is important to us  
since it must regulate our advance,  
on the pledge of Bullion from  
those regions.

We shall be greatly obliged  
by your views of the best mode  
of conducting this business.

I am respectfully

Yrs A. Blanding

Mont May 5. 1853

Dear Sir -

Will you please to call  
on me at the Mount as soon  
as convenient, say at half past  
one or three this day or at noon  
tomorrow -

Yours respectfully

Saml Moore

Mr. P. Fitch

June 3<sup>rd</sup> Feb'y 1883

Saml Moore Esq  
Director of U.S. Mint

My friend  
will in four <sup>to you</sup> weeks forward, a box of  
Plata Pina, wgt 2079 oz.

Please place the value  
of it in New Bank Philadelphia, subject to  
the order of Messrs Robert John Hooper  
of New York, and request the cashier  
to advise those gentlemen of the  
same. You will I think find  
the article of superior quality, our  
dealers speak of parcels of it which  
they have worked up being much  
better than is common.

Yours

Very Respy Yours

John T. Reed

den 20

I enclose you <sup>for transmitting you to your</sup> no better copy of the  
that passed to the Library of the Navy in a <sup>manuscript</sup> ~~manuscript~~  
I enclose him yesterday of which the enclosed is a copy -  
~~the~~ <sup>very</sup> the subject. I have third application <sup>very</sup> ~~very~~  
not a word of it I sent to

It is <sup>unpleasant</sup> ~~unpleasant~~ to call upon ~~large~~ <sup>kind</sup> people again  
and ~~not~~ <sup>not</sup> really ~~mean~~ <sup>mean</sup> to ~~any~~ <sup>any</sup> feelings to be thrown my  
farther on in year - but I am persuaded that you are  
not so spiritual now as it was last year. - *Yours*

In sending the first subject <sup>with the</sup>  
I have drawn perhaps all I can in my power - The  
first drawing must come I know from the Department, but you  
and our friends will judge of what is best - I write to Mr. Dally  
& St. John & Mrs. Howe <sup>and</sup> send them each a copy of my  
letter to the Librarian, ~~with it~~

After to the Library, ~~with~~  
 & This receipt must have been issued  
 only by asking last year for a loan which  
 the best information available did not  
 however seem to suppose missing & which therefore  
 it would have been unavoidable to include a request

With great respect  
 Yours very truly,  
 J. H. P.

How. A. G. Waterbury.

Operations have commenced with the three plain ships  
and all the sloops of the flotilla will be transferred to them  
when in all must work very busily for the 4th of September -

Dear Sir

As this Section of the State is very inadequately  
 supplied with small change, I am desirous of procuring from  
 the Mint a bag of cents & a small Bag of Silver half dollars.

I propose sending you a Draft on the City of New York for 2000  
 and enquire, if you will put up the quantity in such change  
 & forward them to some House in the City of N. York, that I shall  
 designate. By the way of N. York & the Lake, the change can be  
 obtained sooner, & at a cheaper rate, than by land, through  
 Pittsburgh, from which latter City, to this place, there is  
 One hundred & ninety miles. I wish to get  $\frac{2}{3}$  of the proposed  
 draft in cents, and the balance in equal sums of silver half  
 dollars, will you please say to me, if you can, with convenience  
 send them to the City of N. York, at what amount, you will  
 give for the draft, and Upon the receipt of your reply, I  
 can send you the draft, and designate the House, to which I  
 want them forwarded.

I am Sir, Very respectfully,  
 yr. Obedt. Servt.  
 Martin Bentley Cash.

Evans & Corson

Philadelphia March 20<sup>th</sup> 1833

Sir,

A friend of mine requested me to enquire of you in relation to some barrels of sand, now in the yard at the New Mint, and to ask what disposition would be made of them, and that if they were to be disposed of, in what manner, whether by public or private sale and if by private sale, to whom should he apply?

You will better understand what he means by barrels of sand, than I can do only, not having an idea, he observed that it was gathered from washing out the ore at the mine, or was used for that purpose, and that it was contained in flour barrels — Has the old Mint been sold, if sold, who purchased, — You would confer a favour by giving the information asked for if convenient, I expect to see him by to morrow afternoon, a line through the medium of the Postoffice will much oblige

Yours very Obedt Servt  
Stephen Payson Jr

P.S. In what manner is the article, (or rubbish) no longer used in the Mint disposed of, I think that that would be the proper question

## Circular

New York

1833.

The subscribers have perfected a Lock for Banks Doors and vaults on a different principle from any hitherto known and which they propose to furnish to Banks and other institutions that require the greatest possible security.

This Lock has been repeatedly examined by the Officers of the Banks in this City who have given their opinion of its peculiar merits in the annexed certificate. It is made without springs or other complicated Machinery which might be liable to derangement or decay. The frame is of Iron and consists of two parts or pieces; that on the side which adjoins the door being solid, and that on the other side being secured to the former in such a manner that it may be removed at pleasure in order to any desired alterations of the internal arrangement. The bolts are moved by a simple key which performs no other office. The operation by which the bolts are set free and rendered movable is performed by another key which consists of 15 to 20 or more pieces adjusted by the possessor so as to correspond to the arrangement of the parts on which it acts, and which may at pleasure be varied almost indefinitely. Any difference between the arrangement of the interior and of the key will effectually prevent the use of the latter so as to release the Bolts. It is therefore in the power of the purchaser of the lock by his own arrangement thereof and of the key to secure himself effectually against the use of any similar or other key by any other person.

The internal part of the lock is to be taken out by the purchaser while the frame is secured to the door so that the party who performs that service may know nothing of the internal construction.

The mode of constructing these Locks is such, that there is no necessity of making any two alike, and it is the intention of the subscribers in no case to make any two which can be opened by the respective keys of each other. They likewise cautiously refrain from showing the interior of the Lock to any other than gentlemen officially connected with Banks.

The subscribers are now ready to receive orders for Locks of any size for Banks constructed to throw bolts at the side, or at the side, top and bottom. Orders should specify the size wanted and state whether the doors to which the locks are to be secured swing to the right or left hand.

## Terms.

For locks from 10 to 20 inches square and  $1\frac{1}{2}$  to  $3\frac{1}{2}$  inches thick, throwing 1, 2, or 3 bolts at the side 100 \$ each lock with two keys.

For locks of larger dimensions throwing 1 to 4 bolts at the side and 1.

For locks corresponding with the height of the doors to which they are to be attached, and throwing bolts at the top & bottom as well as at the side, a further price according to size &c.

Discount to Banks taking 3 locks 5 per cent; to those taking 3 or more 10 per cent.

J. H. Paine and Brothers

New York, April. 1833.

The undersigned have examined the Patent Lock for Bank doors and vaults manufactured by Messrs J. & P. Son and Brothers, and are of opinion that it is a safe and better lock, than any other known to them. It combines strength with great simplicity of construction, is incapable of being picked, is not liable to get out of order, and from the peculiarity of the internal arrangement and of the key it is susceptible of such numerous changes at the will of the possessor, as to render it secure against attempts to adapt to it with effect any other key than that in use by the owner. We deem it worthy of the confidence of Banks and other institutions requiring locks on the security and strength of which the most perfect reliance may be placed.

Dr Moore Philad<sup>a</sup> June 4<sup>th</sup> 1833

These few lines is to inform you that I  
have left my former place of Residence (118<sup>th</sup> Cortes  
St<sup>y</sup>) and removed to 25 Coomb's Alley and  
still hope through your influence to obtain  
station in the United States Mint

Yours Respectfully J Travilla

New York June 22 1855.

Dear Sir

Allow me to introduce to your acquaintance my friend Mr. Durlap of this city, who is doubtless known to you by reputation as an author and artist. Mr. Durlap is engaged on a history of the Fine Arts in the United States and has collected much valuable & curious information on this interesting subject. In the work he cannot omit the medals and monetary history of our country & I know no man so able as yourself to furnish the information he is in search of.

I am with respect  
your obt. Servt  
P. C. Knaplanck

Dr. Moore

Dear Friend June 2<sup>d</sup> 1833

Dr. R. Munn

C. M. L. L. L.

Sir

Permit me to  
introduce to your acquaintance, my  
friend, friend Mr. Thomas J. N. York  
the Black Man's Lib. & purpose of his  
Establishment, my kindness should this  
fact, will be gratefully acknowledged by

Yours truly

W. Smith

State of Georgia, Lumpkin County, Auraria, June 1833  
 Invoice of Gold sent to the Mint for to be  
 tested in a particular manner - The Numbers are  
 all from different <sup>places</sup> and of course, very many differ in  
 value. The most of them are from New places never  
 worked on before - The Assayer will truly oblige  
 by sending on, to this place, duplicate Certificates as  
 soon as possible.

Custom House

Middletown Conn. July 22. 1833

Sir.

The bearers Genl<sup>l</sup> Map<sup>r</sup> Sage & Russell  
of this place propose to offer proposals for the erection  
of a new Custom House at this place which is to  
be thoroughly fire-proof, & they expect to visit Phila-  
delphia to view buildings of the nature. Should they  
call at the office, I hope you will afford them  
an opportunity to view the building &c.

Very respectfully

Your obt<sup>l</sup> servt

H. A. Phelps

Bank of Darien

July 15<sup>th</sup> 1833.

Sir

The Boy of Gold sent you by our  
 agent, Mr. Roswell King for valuation, on  
 account of the Bank of Darien, you will  
 be kind enough to place to the credit of  
 the Bank of America as authorized by  
 our agent, Mr. Ralph King of Savannah.

Very Respectfully Sir

Yours Obedtly

James Brown  
 Cashier

To the

President of the Bank

Philadelphia

Mint of the United States  
 Philadelphia July 15. 1833

J. L.

Yours of the 6th. was rec<sup>d</sup>. this morning - On  
~~examining the entries on the~~ <sup>record</sup> ~~book~~ of the Mint respecting the subject  
 to which it relates ~~via~~ the deposits of gold made by the Philad<sup>a</sup>. Bank  
 on the 16th. Inst., and conversing with the Officer <sup>then</sup> in charge of  
 the before and after melting I ascertained <sup>from the</sup> ~~that~~ <sup>the</sup> ~~particulars~~ of the  
 counterpoise of the Mint returns.

The gold as you remark had been collected by  
 means of Guilestine. In this State a portion of its rough weight  
 consisted of a residuum of that metal which Mechanical persons  
 have not wholly discharged, nor any degree of heat to which it  
 was <sup>ever</sup> ~~ever~~ <sup>before</sup> ~~before~~ coming to the Mint. It was  
 melted here previously to being assayed and the Mercury being  
 thus <sup>completely</sup> ~~completely~~ separated the weight <sup>was</sup> ~~was~~ proportionally diminished.  
 This measure would be much defective if their description with the addition  
 of a little salt paste which somewhat diminishes the weight  
 by partially refining the gold & this I learn was done in the case.  
~~There is~~ The diminution of weight in the present instance has  
 not been greater than frequently occurs with deposits of the same stuff,  
 though it is slightly above the average. You are aware however that  
 this loss of weight does not affect the quantity of fine gold in

For the United States

1833

To Joseph Howell -

July 15. for measuring the laproate work  
of the Station erected under the appropriation  
for extending the Mineral Establishment -  
from April 7th. 1830 to March 18th. 1833  
inclusive ----- \$263.70

Rec'd July 1833 from Samuel Moon Director  
of the Mineral two hundred and thirty three dollars 30/100  
the amount of the above Bill.  
\$263.70.

Corrected

Joseph Howell

Bank of the State of Georgia  
Branch at Washington  
July 6<sup>th</sup> 1833

Sir

We received a lot of native Gold collected by the aid of Quicksilver, from a mining company, on which we made them an advance, subject to a final settlement at the assay value at the U. S. Mint, say 3900 Dwt. & 18 Grains which was forwarded through the Principal Bank at Savannah to L Campbell Esq Cashier of the Philad.<sup>a</sup> Bank, and from whom a Return from the Mint has been rec<sup>d</sup> in a letter bearing date June 18<sup>th</sup> 1833. which Return is as follows vizt

Gold Bullion deposited 10<sup>th</sup> June 1833  
by the Philadelphia Bank weighing

Before melting	Gross weight	Standard weight
Ounces - Dwt - Grs	Ounces - Dwt	Ounces - Dwt
194. 19. 0	181. 11. 0	183. 12. 6
		\$3264.32

The Mining Company are dissatisfied with the result & think that possibly an error has occurred, there being so large a difference as 13 oz. 8 dwt between the two weights before and after melting, and that 10 oz. is probably the mistake.

I have thought it best to call your

attention to this matter in order that, if an error has occurred, it may be rectified, and if none has occurred, the Bank may be prepared to satisfy the Mining Company on the subject.

I would remark that it would be policy to keep up a good understanding between the citizens and the U. S. Agents otherwise a great portion of our native gold will be exported -

I am very Respectfully  
Your ob. Servt

The President of  
the U. S. Agents  
Philad.<sup>a</sup>

Saml Barnett  
Caser

We have forwarded through the same channel another box containing 2500 Pennsylvanian native gold, which will probably go by the first vessel from Savannah for Philad.<sup>a</sup>

Tacanton August 29. 1833.

Dr. Moore.  
N. S. Mint.

Dear Sir.

We have shipped this week, to the care of Messrs. W & E. D Whitney & Co, 9 casks Copper Planchets, in assorted sizes, which we hope may be satisfactory.

We have several thousand pounds more nearly completed which we shall forward in a week or two.

Those that we make hereafter, will be superior to the present parcel. We have encountered a good many difficulties in finishing them, but trust that we shall be able now to give you an article which will be entirely satisfactory.

We please to drop in a line on the receipt of the parcel named.

Very Respectfully,  
Yours Truly,  
Crosby Brothers & Co

9 casks Planchets.

Extract of a letter to Hiram Smiths from A. C. Cunningham  
Boston. "We send above Cap. Thacker's receipt for a cake of  
Copper Ore, which we are required to have assayed at the mint,  
it is supposed to contain Gold, & we wish the whole may be  
weighed, & then tried, & to have a Certificate from the Principal  
of the Mint, of what it yields, Gold, Copper &c. This certificate  
please forward as soon as possible you can tell the whole for  
what it is worth, towards the expense of refining"

1833  
 Detroit, Sept 11, 1833

Dear Sir,

From putting a drawing one of the  
 shipments of the cuts, amounting to 120 dol-  
 lars, has just been received. The draw is  
 a draft for the 20 dollars, in addition  
 to 100 have been sent you. The bank and  
 post-office are both much in need of 5 and  
 10 cent pieces. If you could furnish them  
 with 2 or 300 dollars worth, half and  
 half, it would be an extremely acceptable  
 favour. The uncertainty of your ability to do  
 so, at this time, prevents me from sending you  
 a draft. Can you advise me on the subject?  
 Dr. S. Moore. Very truly, respectfully,  
 Geo. H. Moore

LREFF

Detroit, August 20, 1833.

Dear Sir,

The above draft is designed to pay for ~~100~~ dollars worth of notes for the Farmers' Mechanic Bank of this city, if you can have them put up and forwarded to Detroit, via New York and Buffalo. Bill, Fish & Abbe, at the foot of Chestnut Street wharf, will give you the names of proper consignees at Buffalo, and will forward the cash or box on. The proper office is to have a portion, and therefore I write.

Yours respectfully,  
 Dr. S. M. M., Director U.S. Mint, *San Francisco*

Dear Sir

Bank of Newmach

Post Office Lancaster, Ohio,  
Sept<sup>r</sup> 4<sup>th</sup> 1833.

Sir,

By Mr. Thomas Reed, Merchant of this place, I send you \$150 in paper money, for which I wish you to deliver him, one hundred dollars in 5 Cent pieces or half dimes, and fifty dollars in copper Cent. Please have them so carefully packed in a keg, so that they will carry well. Mr. Reed will be in the city in 10 or 12 days, when he will call on you for them, please have them put up against he comes, I write you this so that you may prepare them. Please drop me a few lines per first mail, saying if they are ready, and also how much will be the weight of them?

Yours respectfully,

Jacob D. Dietrich Postmaster

Samuel Moore Esq<sup>r</sup>

P.S. If I am correct, coins are transmitted at the public expense and risk to all parts of the U. States. please inform me, as I can make use of many cents, and if so will send for more.

Columbia College New York  
9th October 1833

Dear Sir,

I am glad to see that the medals are at last finished. They are however too late for distribution in proper course. If you meet with a private opportunity for their sale is so good as send them addressed to me. If none occur send them to keep Mr. Barry idea of your city with a request to forward them by the first package of books they are sent by to New York.

Be so good as to transmit me an account of their cost, that I may attend to the appropriation and have it accounted for in order to cover the delay that occurred on the last occasion.

I am Sir respectfully

Yrs

Jas Deane

Prof. J. B. Russell

Detroit, Oct. 1, 1833

Dear Sir,

Your letter, kindly offering to supply us with dinner and half dinners, was duly received. Be pleased to send 300 dollars worth, a draft for which you will find above; 150 dollars of dinner, and 150 of half dinner. Have the goodness to direct the money to the "Farmers & Mechanics Bank, Detroit, M. T." care of Townsend, Knapp & Co. New York. If the box could be sent immediately through by steamboat and stage to New York, in charge of some person on going on, it could be brought on to this

placed by a Michigan merchant now there.

Very respectfully,

Your most obt. servt.

Geo. Horvill

Dr. Samuel Moore,

Minist of the United States  
 Palace: No. 30<sup>th</sup> 1833

~~by hand~~  
 The last ~~deposit~~ of French money  
~~received at the~~ and at the Mint <sup>which</sup> produced to  
 the department ~~of~~ 109 Cents. - When not  
 seasonably worn they will do this generally - A  
~~certificate would be given~~ <sup>which would be given</sup> rather  
 to Shuman but it is not made pay able at  
 a fixed date. The Bank of the United States has  
 as I know also the Branch in New York <sup>will</sup>  
~~the~~ the certificate at 2 per cent ~~for~~  
~~for~~ without respecting the delay of coin-  
 age - If you prefer to wait until the coinage is  
 issued you will in the United States of our Bank  
 receive the amount of your deposit in about 60  
 days -

Very Respectfully Yours,

J. W. M. W. W. W.

New York 28th Nov. 1833

Samuel Moore, Esq.

Dear Sir,

We receive in our business a great number of French Croons and will be very much obliged to you if you will inform us by return mail, or when perfectly convenient, what they will net us at the Mint, how long before we will receive certificate (and at what time they are drawn - We are aware of the trouble we have given you and hope at sometime to be able to reciprocate in some way -

In the meantime we beg to remain, dear Sir,

Yrs. truly Wm. Servat.

 - as the season is late - I hope as little delay as  
 possible - please advise and oblige  
 your most

Allen Appaull

Washington City. 30<sup>th</sup> Dec. 1833.Samuel Moore Esq.  
Director of the Mint.

Sir

The subject of Assay Offices in the Gold districts of North Carolina, Virginia, South Carolina, and Georgia, has been again introduced in Congress, and referred to a select Committee; I have been instructed, by the Committee to request, your opinions: first as to the expense, necessary in materials &c. in each office, for assaying, the finings and value for duty & stamping, the bars. — for what salary a competent assayer could be had — And if the Gold be brought in small parcels requiring melting &c. preparatory to the stamping, what additional expense would be incurred, and what, would be a reasonable per. cent. to be charged for such service — And if the Assayer himself, could not alone perform the service — with any other information touching the subject, you may think proper to give — The object of the Committee as far as I am in possession of their views, is to establish an office in each district, on the most economical terms.

With great respect.

Your Adm<sup>t</sup> friend

Henry W. Cannon

Ch<sup>o</sup> Select Com<sup>o</sup> on Assay Offices

Consulate of the United States

Sir

Hamburg 30.<sup>th</sup> December 1833

I have the honor to acknowledge receipt of the Circular of the 31.<sup>st</sup> August, and forward herewith a package containing Four Hamburg banco shillings which is the only banco coin the Mark and parts being imaginary — — —  
I also forward One double, One single, One half, and One quarter mark Current money, the Current being one-fourth less value than banco —

I have the honor to address —

M<sup>rs</sup> Lamm on the 29.<sup>th</sup> April, stating the real value of the mark banco, and the rate at which the Bank purchases Bullion, which makes the value of the mark thirty-five cents —

The rule is, the Bank gives Twenty four marks and six shillings banco for the mark fine Standard Silver of fifteen lath, or eight ounces, and eight & two thirds piasters, are reckoned for fourteen and one third lath Standard Silver —

Yours Most Obedient Servant

To

John Cuthbert

The Honorable W. B. Duane  
Secretary of the Treasury of the United States

Washington

D. C.

To S. Moore Esq.

Director of the Mint of the U.S.

Sir, Mr Harvey would enquire, what encouragement may be expected from you in the introduction at the U.S. Mint, his newly invented machine for stamping coin —

Provided that he the said Harvey shall first cause the said machine to be demonstrated in this City, or the City of New York, by the actual use of an operating or working machine — 1st that it is adapted to the use of steam power, & 2<sup>d</sup>. that it shall perform the operation well, and is capable of being continued in use without unreasonable expence in repairs, & by an Engineer of ordinary skill —

Very respectfully your Obedt. Servt.

J. M. Harvey

Phil<sup>a</sup> Dec. 27. 1833.

Wm. of the United States  
Philad.<sup>a</sup> Dec 20, 1873

Dear Sir

The box of gold coins <sup>or 664, 665, 666</sup> consisted in my case,  
weighed by the United States 37 ounces 4 dwt. 8 grs. - being 8 grains  
less than engraved on the label - it was weighed with the label attached.  
The assay proves it to be of the fineness of 22  $\frac{1}{2}$  carats the  
value according to which is 90,409 cents for that - making the  
total value \$603.93  $\frac{1}{2}$ . The quantity of gold is sufficient to redeem  
it to standard in value the amount of which any change is noted - the  
above <sup>was</sup> is therefore the net amount of the United States payable  
and round, which will be in 20 to 25 days not exceeding the  
latter period.

I will deposit of it so as to name the highest  
premium during the interval, and equally to your agent until  
the amount is a draft on the Charleston Branch. <sup>A premium</sup> ~~is not obtainable~~  
~~which is a premium of two per cent~~ <sup>is not obtainable</sup>  
~~with less than~~ <sup>in</sup> ~~the market~~ <sup>is not obtainable</sup> of more than \$100 for  
Gold does not now offer probable within ten or in  
New York -

I am with great respect

Yours truly

Samuel Wood

Your Obed<sup>t</sup> Serv<sup>t</sup>

A. H. W. 1833

To William Findlay Esq  
Treasurer of the Mint  
Philadelphia

Consulate U. S. A.

Amsterdam 7th December 1833.

Hon<sup>ble</sup> Secretary of the Treasury  
Washington

Sir!

In compliance with the request, contained in your Circular letter of 28th August I have sent specimens of the coins current in the Netherlands, by Capt<sup>n</sup> Hurty of the barque *Isabelle* for Philadelphia, & Duplicates of the same by Capt<sup>n</sup> Deenloof of the brig *Philbolet*, to New York, as per enclosed List, to be delivered to the Collector of the port, when they arrive.

All the coins are current at their nominal value. The *Rijders* & *Ducats* alone cannot be had at par. For the former I had to pay f. 1.10 premium & the latter 50%. These two sorts do not properly belong to the current coins, & are only merely an object of curiosity. Ducats are often exported to a great amount to Russia, Turkey, &c. —

I have given publicity to the Circular of your  
Department dated 20th. April last, addressed to  
the Officers of the Customs for the purpose  
of making known the necessity of a verification  
of the Invoices of all articles liable to duty,  
whether specific or ad-valorem.

I have the honour to be!

Sir!

Your obedient Servant.

John W. Parker  
Consul U. S. A.

Treasury Department  
November 15. 1833.

I enclose a copy of the Resolution of the House of Representatives of the 1<sup>st</sup> of March last I have to request that you will make the communication required by it, to this Department at your earliest convenience. It may be that a copy of the Resolution has heretofore been transmitted to you - If so, the Department in consequence of the destruction of the treasury building by fire, has no record of the fact.

I remain very Respy  
Your Obedt. Servt.

A. B. Taney  
Sec. of the Treasury.

Saml. Moore Esq.  
Director of the Mint
